

WHY CHOOSE EGW UTILITY SOLUTIONS?

- We have a deep understanding of the underground utilities industry and its unique and complex nature.
- We approach each customer with the goal of solving their problems rather than just selling a product or service. Continued support throughout is our commitment.
- We pride ourselves on our highly responsive service. Our experienced sales representatives and service delivery team are here to help you get the job done right, every time.

- Solving Problems
- Making Connections
- Serving Others

- Polyethylene Pipeline Fusion Training & Certification
- Annual PE Fusion Recertifications
- Fusion Equipment Inspections

OPERATOR QUALIFICATION SERVICES

EGW Utility Solutions is a third-party provider of Operator Qualification (OQ) services with a team of accomplished professionals located throughout the nation. We have partnered with Industrial Training Services (ITS), Energy WorldNet (EWN), and Veriforce to become an Approved Provider (AP) of their OQ training and evaluations. They are considered the gold standard for OQ learning management companies within the industry.

We are approved for contractor OQ and Fusion services for numerous operators across the US, with evaluators who are among the most experienced in the industry, ensuring the safety and integrity of the compliance processes. Our mobile evaluators can provide services on-site at your place of business or at our training facility located in the Dallas-Fort Worth Metroplex.

We can accommodate most OQ or training needs quickly and efficiently and support any bilingual training and testing needs you may have.

If you need assistance navigating complex O&M, Federal DOT, and State safety requirements, call EGW Utility Solutions today.

POLY-FUSION TRAINING & CERTIFICATION

In addition to OQ Services, EGW offers comprehensive third-party training, testing, and certification for Polyethylene Pipeline Fusion. We are an approved provider of fusion training and testing services for multiple operators, and our training and evaluation services can be conducted either on-site or at our well-equipped training facility.
